

Maths Challenge

Foundation - Spring Term 2

I can say what is one more than a number (up to 10)

By the end of this half term, children should be able to say the number that is one more than any number to 10.

My 0 to 20 number line

Key Vocabulary

More than

Counting

Next

Bigger

The important aspect of this challenge is that children can say the number that is one more than a given number.

Mastering the facts

Now that your child is secure with counting forwards and backwards they can practise saying the number that is one more. You could begin by using a number line and asking your child to point to a given number. Then jump forward one to the next number to find the number that is one more. Once your child is secure using a number line you could ask them to work out the next number mentally.

Top Tips

The secret to success is practising little and often. You could practise while walking to school or during a car journey. Online games can also help children practise their maths skills (*please see our website for suggestions*).
