

Maths Challenge

Year 1 - Summer 2

I can recall the doubles and halves for the numbers 1 to 10.

By the end of this half term, children should know double and half of a number up to 10 and be able to recall them **instantly**.

For Example;

Double 1 = 2

Half of 2 = 1

Double 2 = 4

Half of 4 = 2

Double 3 = 6

Half of 6 = 3

Double 4 = 8

Half of 8 = 4

Double 5 = 10

Half of 10 = 5

Key Vocabulary

Double

Half

Halves

Add

Groups

The important aspect of this challenge is that children can recall doubles and halves quickly.

Mastering the facts

If your child knows these facts, they can practise solving addition and subtraction number sentences with missing numbers. For example $4 + \underline{\quad} = 8$.

You could also practise worded problems such as *I have 3 sweets. My friend has double the amount I have. How many sweets does my friend have?*

Top Tips

The secret to success is practising little and often. You could practise while walking to school or during a car journey. Online games can also help children practise their maths skills (*please see our website for suggestions*).
