

Maths Homework

This week in Maths we have continued to learn about matching and sorting.

Can you find items around your home that you could sort in different ways? For example, a group of things you would find in the kitchen, a group of things you would eat, a group of things the same size or colour.

Below are some examples you could try and find.

Once you have found things to sort please take a photo and send it to us on Dojo!

We can't wait to see what you will find!
