

Reception Maths Homework

This week in Maths we have been learning about the composition of numbers 1, 2 and 3 and how they are made up of smaller numbers.

Can you count out 2 objects and explore the different ways of making 2 by splitting into different groups, for example 1 red pencil crayon in one group and 1 blue pencil crayon in another.

Can you find the different ways of making 3 using 3 objects? Can you split the objects into different groups? For example you may have 2 pencils in one group and 1 pencil in another.

Use objects or toys from around your house to split into different groups to show how 2 and 3 are made up of smaller numbers.

Please take a photo and send it to us on Dojo!

We can't wait to see what you achieve!
