

Maths Homework

This week in Maths we have been learning about numbers to 5 and the different ways to make numbers up to 5.

Can you count out five objects, and show different ways to make five? For example, you could split your objects into a pile of 3, and a pile of two.

Below are some examples you could try and find.

2 teddy bears and 3 cars.

1 fork and 4 spoons.

3 books and 2 bricks.

Once you have found things to sort please take a photo and send it to us on Dojo!

We can't wait to see what you will find!
